DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 & 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gordon, (U.S. Pat # 6,510,554), in view of Katsuyama, (U.S. Pat # 5,701,385).

Considering claims 1 & 36, Gordon teaches an apparatus (20) that enables a user to access a plurality of programs, wherein playback is performed by skipping or fast forward; see col. 4, lines 20-50. Gordon also discloses a decoder, and driver module; see Fig. 1. As for the amended claimed 'each program being represented by a single frame in the first display', such

Art Unit: 2623

that 'at least these single frames are configured to be displayed on a display module, based on the display signal', and 'at least these single frames for the plurality of scenes are configured to be displayed on a display module based on the second display signal', Gordon does not discuss feature such a technique.

Nevertheless, Katsuyama discloses an invention wherein upon replaying video information from a recording medium, the user is presented with a display that shows a frame respectively, for each one the plurality of video programs on the instant recording medium, Abstract; col. 17, lines 21-52; col. 18, lines 21-35; col. 22, lines 64-67; col. 24, lines 34-60; col. 25, lines 45-66; col. 29, lines 21-67; col. 30, lines 1-30; Fig. 21; Fig. 24-26 & Fig. 31A-31H. As for the claimed 'small frame', see Katsuyama, Fig. 31A-31H.

It would have been obvious for one ordinary skill in the art at the time the invention was made, to modify Gordon with the feature the 'small frame', still picture in Katsuyama, that the user selects in order to retrieve a video from the recording medium, see col. 16, lines 60-67.

Considering claims 35 & 37, Gordon & Katsuyama teaches the claimed subject matter, see col. 8, lines 25-55.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

A) Sezan Teaches allowing a user to access programming using a thumbnail image.

B) Boyce Trick play that skips every nX frame to be presented to the user.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
